

CHANDRASEKARAN K

Detail-oriented Biomedical Engineering graduate with strong analytical and problem-solving skills. Proficient in Java, SQL, Excel, HTML with a foundational understanding of Machine Learning. Passionate about software development and eager to contribute to innovative projects while continuously learning and growing in a dynamic IT environment.

Educational Background

B.Tech (Biomedical Engineering), SMVEC (2022–26) – **CGPA** :8.16
HSC, Sri Sankara Vidhyalaya – 86% (2022)
SSLC, Sri Sankara Vidhyalaya – 90% (2020)

Projects

- **Hospital Management System using Java, JDBC & MySQL**: Developed a Java-based Hospital Management System with JDBC and MySQL to manage patient records, doctor information, and appointment scheduling through a menu-driven console application.
- **Low-Cost Myoelectric Bionic Arm (EMG sensors, Arduino)**: Worked on a prosthetic arm using EMG sensors and Arduino.
- **Smartwatch-Based Non-Invasive Alcohol Detection (IoT, wearable)**: Developed an Idea of IoT-based wearable to monitor alcohol levels via sweat analysis.
- **Abnormal Brain Connectivity in Neurological Disorders (GNN, fMRI datasets)**: Applied GNN to analyze complex fMRI datasets. Processed large volumes of neurological data to identify patterns, demonstrating strong capability in data interpretation and analytical modeling.

Internships

- Machine Learning course at Persevox -1 Month
- Biomedical Engineering–Schiller Healthcare india pvt ltd (Offline Internship) for 2 Days
- Hospital Training - SMVMCH for 3 months
- Biomedical Instrumentation – Medcuore (Offline Internship) – Worked on human assistive device design and testing for 1 Week
- Android Developer – Google (Virtual Internship) – Developed basic healthcare mobile applications with SQLite integration.

Certifications

- Machine Learning (2 Projects)- Persevox(2026)
- Machine Learning Foundations- AWS Academy(2026)
- MATLAB onramp by MATLAB(2025)
- NPTEL – IoT and Biomedical Signal Processing (2024)
- Biomedical Devices Workshop – LEEWAY Biomedical
- IoMT using Raspberry Pi – VEI Technologies

Achievements

- Workshop Series - MATLAB for AI Data Analytics & IoT for 3 Months
- Poster presentation conducted by SSN secured 2nd position- “AI in Robotics”
- Presented a Paper titled as “Genetically optimised breast cancer diagnosis system using a LS-SVM classifier” at AMET University
- Presented a paper titled as “Low cost myoelectric bionic arm” at SSN University
- Presented a paper titled as “Smartwatch-Based Non-Invasive Alcohol Detection” at TAKSHASHILA University

Contact

Skills

Personal Traits

- Work ethics
- Active listening
- Interpersonal communication
- Conflict resolution

Programming Language

- Java - intermediate DSA
- SQL - Intermediate
- Machine learning-Basics
- HTML

Tools/Software

- VS Code
- MATLAB (Data Analysis)
- MS Office
- Jupyter Notebook

Languages

- English
- Tamil

Interested Areas

- Software Engineer
- Quality Assurance
- Healthcare Software
- Application Development

Industrial visits

- Prashan Medical Technologies
- Machenn Innovation Technologies
- Sinoatrial Medical Technologies

Additional Information

- Serving as Class Representative, demonstrating initiative in advocating for student improvement.
- Actively involved as a Member of the BIS Club.
- “First responders training program” certified by AVMC and Rotary Club
